TECHNICAL SPECIFICATIONS

BEACONICLYTE⁺

Sample Type

Whole Blood, Serum, Plasma, Urine etc.

Electrodes with Instrument

Sodium, Potassium, Chloride

Optional

pH, Ionic Calcium, Lithium

Analysis Time

50 Seconds

Temperature

Room Temperature, 15°C - 32°C (60°F - 90°F)

Printout

Built in thermal printer

Relative Humidity

< 85%, non-condensing

Normal Values

Flagging of abnormal results,
Normal values in printout

Calibration

1 point with every sample & 2 point,
every 4 hours

Power Requirements

110 - 240 V, 50/60 Hz (self adjusting)
1.4 Amp Max

Dimensions

H x W x D : 38.5 x 32.5 x 30.5 cm

Weight

6 Kgs (13 lbs) apprx

FEATURES

-  Capacity of 10,000 Patient Results
-  Facility to Add More Parameters
-  No External Bio Hazard Waste
-  Disposable Cartridge
-  Reliable & User Friendly Menu
-  Precise and Accurate Results
